(Eyelet Kits—item #730-33-T, #730-37-T, #730-65-T)

The parts:

Each kit package contains 15 eyelets, inserts & washers and 1 tool set.
Each eyelet package contains 15 eyelets, inserts and washers.
Each tool set contains 1 anvil and 1 setter

What is a 2-part eyelet?

It is an eyelet with a separate front and back piece. The front rolls smoothly over the back so the surface is suitable for use next to the skin. An insert sits between the front and back, providing extra stability and support, eliminating the need to reinforce the area with interfacing. Two-part eyelets are great for laced effects on garments, costumes, bags, totes and craft projects; they are easy to apply, fit tightly against the fabric, and have a professional finished appearance.

How do you attach a 2-part eyelet?

1. Mark position of eyelet by tracing around inside opening of eyelet. Cut hole with small scissors. *NOTE: For fabrics with stretch, cut hole smaller than inside opening of eyelet.*
2. Insert deep half of eyelet into hole from right to wrong side of fabric.
3. Place insert over center of eyelet on wrong side of fabric.
4. Place washer (back of eyelet), dome side up, over insert.
5. With wrong side of fabric facing up, position eyelet front on anvil and insert setter into eyelet. Hammer gently until front and back fit tightly together. Center of eyelet will roll over and provide a smooth finish.

TIP: Work on a hard surface, such as cement or stone for best results.
